WHAT IS ROXGARD

CHEMIX ROXGARD represents the next evolution of Paint Protection Film (PPF), engineered through the integration of cutting-edge nanotechnology and advanced material science from global innovators. At its core lies the proprietary Organic Polysilazane (OPSZ) and Perhydropolysilazane (PHPS) resin technology — a breakthrough that pioneered a superior anti-permeation nano matrix. This advanced molecular structure enhances surface resilience, chemical stability, and self-defense capabilities, redefining the standard of protection in PPF technology. With its unmatched durability and long-lasting clarity, CHEMIX ROXGARD exceeds the performance of conventional films, offering unprecedented confidence and protection for high-value surfaces. CHEMIX ROXGARD represents the next evolution of Paint Protection Film (PPF), engineered through the integration of cutting-edge nanotechnology and advanced material science from global innovators. BENEFITS

- Chemical Etching Resistance
- Full Surface Shielding
- High-Gloss Finish with Deep Color Enhancement
- Resistant to Stains & Discoloration
- Self-Healing Technology

ROXGARD PRO

CHEMIX ROXGARD PRO represents the pinnacle of paint protection innovation, developed with advanced Perhydropolysilazane (PHPS) resin technology — one of the most sophisticated material sciences in the market today. Engineered to perform under the harshest environmental conditions, PRO shields your vehicle's surfaces from everyday threats such as gravel impact, scratches, acid rain, bird droppings, and tree sap, effectively preventing paint chips and surface degradation. It offers exceptional stretchability, an ultra-smooth surface finish with supreme gloss, and outstanding optical clarity — delivering unmatched protection and aesthetic excellence wherever the road takes you.

ROXGARD INFINITY

CHEMIX ROXGARD INFINITY Infinity combines the hydrophobic brilliance of ceramic coatings with the superior protection of a premium self-healing paint protection film (PPF). Powered by advanced Nano technology and reinforced with Organic Polysilazane (OPSZ) resin innovation, this film delivers an ultra- glossy, crystal-clear finish without the orange peel effect. It provides exceptional resistance against stone chips, scratches, and environmental contaminants — ensuring your vehicle's surface remains flawless and protected. Scientifically proven and validated by nanotechnology experts, CHEMIX ROXGARD INFINITY outperforms conventional coatings, redefining the benchmark for next generation surface protection.

ROXGARD COLOR

CHEMIX ROXGARD COLOR redefines what paint protection can do. Built on the same advanced Perhydropolysilazane (PHPS) resin technology as our PRO series, Color goes a step further — transforming your vehicle's finish while shielding it from everyday threats like gravel impact, scratches, acid rain, bird droppings, and tree sap. Choose between a stunning high-gloss shine or a refined matte finish to match your style. Beyond protection, ROXGARD COLOR lets you reinvent your vehicle's look with a fully customizable color-changing film, all without compromising on stretchability, surface smoothness, and optical clarity.
